DOTSTER CONNECTS THE DOTS ONCE AGAIN MAKING .EU DOMAIN NAME REGISTRATION EASY AND AFFORDABLE

Vancouver, WA – Dotster, Inc., one of the first accredited and most trusted providers of discounted domain registration, web hosting packages, and services announces its plan to offer the new .EU (European Union) domain name for \$14.95 available on April 7, 2006 – substantially less than other registrars. In continuing with its tradition of providing its consumers with economical and easy-to-use web, domain and marketing packages, as well as best in class customer service, Dotster will offer this discounted rate until April 13, 2006 through its 1495eu coupon code.

“Dotster is proud to offer the .EU domain name to its customers at such a reduced rate,” states George DeCarlo, Vice President of Marketing, Dotster, Inc. “We are delighted that the .EU domain name is about to launch and pave the way for millions of new websites. We want our clients to be able to participate in the excitement and possibility of seemingly endless new domain names, and do so affordably.”

Registration for the .EU domain name is made simple and reasonably priced through Dotster- an accredited registrar of the .EU name. Eligibility for a .EU domain name includes meeting one of the following criteria: Undertakings having their registered office, central administration or principal place of business within the European community; organizations established within the European community without prejudice to the

application of national law; and natural persons resident within the European community.

Additionally Dotster, in anticipating a “landrush” opportunity similar to that of .com, is providing those interested and eligible with a pre-registration option prior to the April 7 launch date through its LandRush application. Minimum requirements for pre-registration include the following: physical persons residing in the European Union; organizations having a registered office, headquarters, or their main place of business within the European Union; and applications from individuals or organizations that cannot establish such links with the European Union will not be considered. This rule applies at all times. All the above information and more is available at http://www.dotster.com/domains/domains_cctlds_eu.php.

For additional information, visit EURid’s website at www.eurid.eu - the not-for-profit organization appointed by the European Commission to operate the new .EU domain.

About Dotster, Inc.

With nearly three million Internet domains, Dotster, Inc. is one of the largest Internet Corporation for Assigned Names and Numbers (ICANN) accredited domain name registrars in the world. ICANN, now performing the functions of previously U.S. government contracted

entities, is responsible for Internet Protocol (IP) address space allocation, protocol identifier assignment, generic (gTLD) and country code (ccTLD) Top-Level Domain name system management, and root server system management functions.

Launched in 2000, Dotster was among the first to offer long-term registrations and discounted pricing. Dotster offers superior online account management tools and dedicated support from its customer care team. The company's services include web hosting, DNS management, website development and marketing services, and partner programs.
