DOTSTER REVITALIZES WEB HOSTING WITH NEW PACKAGES OFFERING THE BEST VALUES ON THE INTERNET TODAY

Vancouver, WA – Dotster, Inc., one of the first accredited and most trusted providers of affordable domain registration, web hosting packages and services, announces an entirely new suite of Web hosting packages that give businesses and consumers some of the best values available on the Internet today. Dotster's new packages feature expanded capabilities that will satisfy customer needs -- such as increased storage space and more bandwidth – at a cost that is the same as current price points. Dotster will also automatically upgrade all current customer's packages on its latest hosting platform to reflect the new capacities, providing great service for new and existing customers alike.

The added storage space allows for more content, links and pages as well as higher-quality graphics and photos on a users web site. The expanded bandwidth ensures that the user's web sites can handle the increase in interactive traffic as their business or community grows.

“Dotster's new web hosting packages underscore our commitment and emphasis to deliver the best value and highest level of service to our customers,” said Clint Page, CEO, Dotster, Inc. “The aim is to pack each hosting package with tremendous space, speed, and technology while keeping the price aggressive. I'm confident what we've created is the greatest web hosting value currently available on the Internet.”

In 2005 Dotster, already an award-winning hosting

provider, invested in a dramatic upgrade of its hosting platform and subscription plans to deliver state-of-the-art products that lead the industry in security and reliability. Dotster currently provides its customers with five different web hosting packages, each designed for individual needs and all offering highly reliable features and support.

All packages include free e-mail and advanced features such as web analytics, Microsoft Front Page plug-ins and MySQL or MSSQL databases. In addition, the packages feature value-added services including free DNS Management, e-mail forwarding and a host of free scripts that allow users to add advanced functionality to their Web sites. These free scripts include e-commerce and payment processing, content management, chat, search, galleries, polling, blogs and games.

Dotster's new web hosting package array includes:

- **Starter Package:** Provides enough storage and bandwidth for most customers. Now offers 5GB of storage and 250GB of transfer. Cost remains \$5.95 per month.

- **Standard Package:** Dotster's most popular package. Allows users to host up to 50 domains with one hosting package. Provides 10GB of storage, 500GB of transfer and 150 e-mail accounts. This is a 5X increase in storage space and 10X increase in transfer from the

current standard package. Cost remains \$8.95 per month.

- **Advanced Package:** Perfect for businesses providing increased storage and bandwidth and a range of features, including a full library of scripts. Currently features 20GB of storage space and 1,000GB transfer. Cost remains \$14.95 per month.

- **Pro Package:** Provides greater resources to professionals with more complete hosting needs. Now offers 35GB of storage and 1,500GB of transfer. Cost remains \$19.95 per month.

- **Premium Package:** Offers maximum storage and bandwidth with unlimited domains, databases and e-mail all in one plan. Now provides 50GB of storage and 2,000GB of transfer. Cost remains \$24.95 per month.

All enhancements and new packages are available on both Windows and Linux platforms, starting at \$5.95 per month. For additional information on Dotster's new suite of web hosting packages, please visit www.dotster.com/webhosting.

About Dotster, Inc.

With nearly three million Internet domains, Dotster, Inc. is one of the largest Internet Corporations for Assigned Names and Numbers (ICANN) accredited domain name registrars in the world. ICANN, now performing the functions of previously U.S. government contracted entities, is responsible for Internet Protocol (IP) address space allocation, protocol identifier assignment, generic (gTLD) and country code (ccTLD) Top-Level Domain name system management, and root server system management functions.

Launched in 2000, Dotster was among the first to offer long-term registrations and discounted pricing. Dotster offers superior online account management tools and dedicated support from its customer care team. The company's services include web hosting, DNS management, website development and marketing services, and partner programs.
